## Branding Guglielmo Winery

Our main goal was to capture the three Generations at Guglielmo Winery from the tools used in a past time, that remain on the property, to the third generations' current wine making facility. George Guglielmo gave us a tour of the winery showing us the history of how the family operated the winery from their 1925 beginnings to their present day operations. It was exciting to see and photograph time that has stood still in some places and the current activity that is alive on the grounds. The wine making passion that George carries in his genes shows from his knowledge and hands on work with the vineyard, bottling and tasting room to his kind words of his past and current family. He is a family winemaker to his core.

We enjoyed capturing the winery in all of its' element and working with the humble and enjoyable Guglielmo Winery Family and Team.
